

Our Vision

At Coaching360, our vision is to ignite a global transformation by positively impacting 1 billion lives. We are driven by an unwavering commitment to empower the ordinary person to dream extraordinary dreams. We exist to inspire belief and catalyse change, coaching individuals to achieve their dreams and create a life that truly works for them.

Our Values

Our People

First and foremost, we are people. We look after the personal and mental wellbeing of everyone around us, both inside and outside of the work place. We win together, we lose together, we celebrate together.

Trust

Trust is everything. We give trust, we maintain trust and we continually work on relationships built on trust by meeting our commitments and having the best interests of everyone at heart.

Top Notch Banter

Our team is the definition of work hard, play hard. Although we take our work extremely seriously, there's never a dull moment at Coaching 360. Each and everyone of us is dedicated to creating a safe, fun and slightly ridiculous experience at work.

Speed

We move at a fast pace daily, we don't delay, we make quick but rational decisions and we live life to the full. Time is precious so make the most of it.

Ownership

We are responsible and we take ownership for ourselves and our work. We are comfortable making decisions and owning situations, safe in the knowledge that we all have each other's backs.

Truth

We lean into the truth with positive intent, never backing away from it. We always answer questions truthfully. When delivering the truth, we do it with sensitivity, tact, diplomacy and understanding.

Opportunity

We support each other by seeking out opportunities that allow us to be our best and achieve our dreams, both inside and outside of the workplace. We encourage each other to live our best lives.

Balance

We know that balance is different for each individual. We work out our personal balance, in life, health, wellbeing and work, and support each other to continually live it.

Belief

We believe in our dreams and goals, and we instill belief in others.
#believetosucceed

Gratitude

We actively express gratitude. We look at what we are grateful for in life and focus on the positives so that they continue to grow. We give to our community, we give to each other and we give without expectation of return.

Growth

We have a will and desire to grow and succeed. We actively seek opportunities for growth in our personal lives, business lives, for our clients and for our community. We push ourselves to step outside our comfort zone and be comfortable with being uncomfortable.
